NEXGEN BOBTAIL

Industry leader in the most reliable Propane Bobtails on the road.

Since 1959, we have built quality into every aspect of every rig. From initial design to the final inspection, a JARCO unit is fabricated to be the most reliable bobtail on the road. In 2010, JARCO became part of Polar Service Centers. The combination of JARCO's capabilities with Polar Service Centers nationwide network, makes for a winning combination for your propane delivery vehicle needs.

NEXGEN BOBTAIL IMPROVES LIFE CYCLE COSTS

POLAR

1

CORROSION RESISTANCE

Phosphate Coatings promote the bonding of powder coatings to the metallic substrate and impede the spread of any corrosion under the powder coating.

2

IMPACT RESISTANCE

Any scars or nicks are limited to the point of impact, allowing for easy repair.

3

FIVE-YEAR WARRANTY

Offering protection that traditional paint methods cannot match, powder coating is warranted for a full five years.

ENVIRONMENTALLY "GREEN"

Organic compounds increase rust resistance without using environmentally harmful materials.

POWDER COATED TANKS

A total of 5-6 mills thickness provides durable coverage for hard-working bobtails.

- 1 Three-stage pretreatment (steel grit blast, phosphate wash and final seal rinse) properly prepares the steel surface.
- 2 Zinc epoxy primer plus top coat provides maximum protection.
- 3 Fast, efficient infrared ovens cure the powder coating to the tanks.

"Service is great. Polar has locations in many areas where we travel, so if necessary the trailers can get the attention and service they need if they're away from our own shops. It minimizes downtime while making sure our equipment is properly repaired or maintained on schedule."

Greg Graves – Kane Transport

NEXGEN BOBTAIL

ALL STAINLESS PIPING

- Corrosion proof
- Zero-maintenance piping at no extra cost

STAINLESS OR ALUMINUM DECKING/FENDER OPTIONS

- Engineered for strength and durability
- Eliminate corrosion issues

MODULAR CONSTRUCTION EASY SERVICE AND REPAIRS

- Separate components allow for low cost, inexpensive repairs
- Replace only the component that is damaged in case of accident

SUPERIOR FENDER DESIGN FOR TANK PROTECTION

- Designed to protect barrel from road debris
- Spacious area around wheels allows for quick wheel/tire service

NATIONWIDE CUSTOMER SUPPORT

- Parts and service support from national Polar Service Center network
- Tank swaps done regionally
- Centralized product engineering and technical capabilities
- Division of largest tank/trailer manufacturer in North America
- Large inventory of completed stock units, chassis and barrels
